

Electric Vehicles

Transportation is the biggest source of carbon pollution in Colorado.

The Opportunity

Emissions from gas-powered vehicles can lead to asthma, lung and heart disease, cancers, and more—but low-emissions and zero-emissions electric vehicles (EVs) are already helping in big ways.

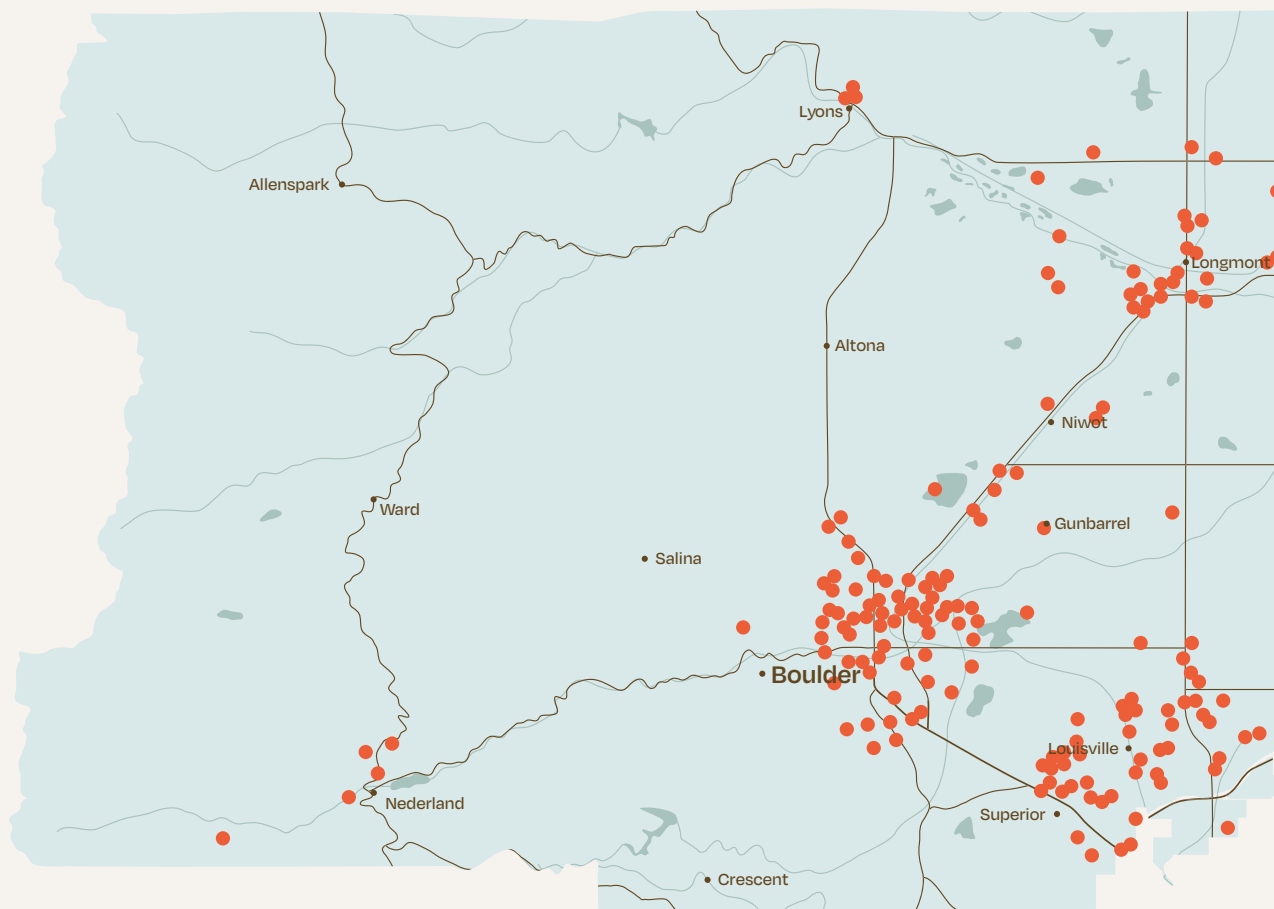

Battery ranges and charging networks are improving every day as EV adoption continues. Cleaner air, easier maintenance, and big savings (through incentives and fueling) are keeping the trend going.

Equitable EV Charging in Boulder County and the State of Colorado

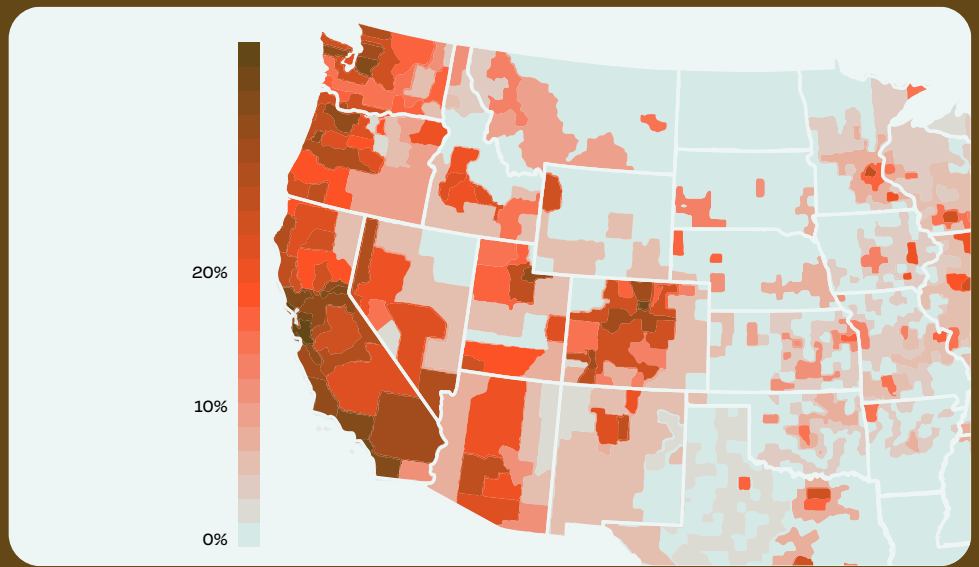

Explore the EV charging network that is growing across Boulder County.

Public Charging is Taking Off - Hot Spots Across the Country for the EV market

U.S. DOT recently awarded Boulder County nearly \$5 mil. to install more public EV chargers.

Boulder County has long been a leader in EV adoption. A recent study from the U.S. Department of Energy found that Boulder County has the fifth-highest EV adoption rate of all U.S. counties, and the highest outside of California.

The grant will fund public EV charging stations in low- and moderate-income neighborhoods, rural areas, and communities with high densities of multifamily units. Funding will support both Fast Chargers (aka Level 3 chargers), which can charge a typical EV to 80% in 30 minutes, and Level 2 chargers, which add roughly 10-20 miles of range per hour of charge.

Get Money

Buying an EV is more affordable than ever. The federal government, the state of Colorado, and even utilities have incentives for purchasing or leasing vehicles and setting up at-home charging. Used cars qualify too! [Browse a Complete List of Opportunities.](#)

Stay in the Loop

Roughly once a quarter, Boulder County issues the Drive Electric newsletter—a great resource for staying on top of rebates, resources, events, and more. [Sign Up for the Newsletter.](#)

Find a Charger

Worried about charging on the road? Don't be! The EV charging network is growing fast, and services like PlugShare give you exact locations, charging speed and costs, nearby amenities, and more. [Find a Convenient Public Charger.](#)
